AY-K20B

Micro-Mullion Multi-Format Proximity Reader

Rosslare's AY-K20B is a powerful RFID proximity card reader of 125-kHz cards and tags, featuring multi-format output and an excellent read range. The reader supports both standard EM and Rosslare format cards, and is highly flexible with behavior control options. With a sleek design and a tough UV-resistant and water-resistant casing, the AY-K20B is equally suited to indoor and outdoor use.

GENERAL DESCRIPTION

The AY-K20B with selectable output format reduces stocking costs, while offering various control options such as hold, buzzer and multi-LED color control.

Supporting the Rosslare format for card reading, this reader offers a secure and economic solution where non-standard card formats should be used. The unit is designed for easy mounting with hidden screws (security screws may be used to enhance strength) and cover. Optical tamper adds protection against wall removal, and the buzzer adds audible RFID card read notification. LED control provides system based information to the end user.
